## **DETAILED ACTION**

### *Priority*

1. This application is identified as a division of application Serial No. 09/448,835. It does not appear that the instant application is the product of an examiner-initiated restriction requirement. This application may be subject to double patenting rejections.

### *Double Patenting*

2. Claims 1-20 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-10, 17-22 and 24-40 of U.S. Patent No. 6,958,053 (hereinafter “Reilly ‘053”) in view of U.S. Patent No. 5,383,858 to Reilly et al. (hereinafter “Reilly ‘858”).

The patented claims of Reilly ‘053 contain the same limitations of the application claims but does not claim a body, plunger, encoding device and housing. Reilly ‘858 discloses an injector system having a body 32, plunger 38, encoding device 70 and housing 26. See Figures 1-10. It would have been obvious to one of ordinary skill in the art to modify the claims of Reilly ‘053 to include the elements disclosed in Reilly ‘858 because a body, plunger and housing are inherently part of an injector system and an encoding device would prevent accidental misdose to a patient.
